Experiment – 12

End-End communication at transport Layer

a) Implement echo client-sever using TCP/UDP Sock

b) Implement a chat program using Socket program

TCP

— server —

```
def start_sever():
    serucr = socket.socket(socket.AF_INET, Sock
STREAM)
    Server.bind('127.0.0.01', 5000))
    Server.listen(1)

    conn, addr = server.accept()
    print(f"[server] connected by {addr}")

    while true:
        data = conn.recv(1024).decode()

        Conn.send(f"Semer received: {data}"enco

    Conn.close()
    Server.close()
```
